Show databases: This command will list existing databases in impala.

show databases;

```
[quickstart.cloudera:21000] > show databases;
Query: show databases
+-----+
l name
+----+
| impala builtins |
| default |
| jdk
licdw
| rjcollege |
select current_database();
[quickstart.cloudera:21000] > select current database();
Query: select current database()
+-----
| current_database() |
+----+
| default | +----+
show tables;
[quickstart.cloudera:21000] > show tables;
Query: show tables
+----+
name
+----+
| sample 07 |
| sample 08 |
+----+
show tables in jdk;
```

```
[quickstart.cloudera:21000] > show tables;
Query: show tables
+----+
| name |
| sample 07 |
| sample 08 |
+----+
```

show tables like 'sample*';

Create a database: This command is used to create a database. **Syntax:** create database <database name>

create database RJ;

```
[quickstart.cloudera:21000] > create database RJ;
Query: create database RJ
```

show databases;

use RJ;

```
[quickstart.cloudera:21000] > use RJ;
Query: use RJ
```

```
Create table: This command is used to create tables.
Syntax: create table  (field name1 data type,
field name2 data type);
create table t1 (x int);
Query: create table t1 (x int)
Fetched 0 row(s) in 0.37s
Show tables is used to view all the tables in current database
show tables;
Query: show tables
+----+
| name |
+----+
| t1 |
+----+
Fetched 1 row(s) in 0.13s
select current_database();
[quickstart.cloudera:21000] > select current database();
Query: select current database()
| current_database() |
+----+
| RJ
+----+
Fetched 1 row(s) in 0.16s
```

Insert: This command is used to insert records in either overwrite or append record in tables.

Syntax: Insert into <database_name>.<table_name> values(field_value1,

field value2)

insert into t1 values (1),(3),(2),(4);

```
[quickstart.cloudera:21000] > select x from t1 order by x desc;
Query: select x from t1 order by x desc
+---+
| x |
+---+
| 4 |
| 3 |
| 2 |
| 1 |
+---+
Fetched 4 row(s) in 0.82s
```

Order by: This is used to sort the data

select x from t1 order by x desc;

```
[quickstart.cloudera:21000] > select x from t1 order by x desc;
Query: select x from t1 order by x desc
+---+
| x |
+---+
| 4 |
| 3 |
| 2 |
| 1 |
+---+
Fetched 4 row(s) in 0.82s
```

Aggregate functions:

select min(x), max(x), sum(x), avg(x) from t1;
